

I am writing concerning the NAB's petition 04-160. People who pay for satellite radio should benefit from the services provided. Instant Traffic & Weather on satellite radio is a service I pay for, and would like to keep. Most local stations only have traffic and weather on during drive time. Satellite radio makes it available all of the time. Please don't take this service away. If the local stations aren't happy about the competition they should find ways to improve themselves and not go crying to the government. This is America, for crying out loud!

Thank you very much for your consideration.
